

Tauw

Transaction Services

The ENVIRONMENTAL – SOCIAL – GOVERNANCE (ESG) perspective in the investment market delivers a huge contribution to the value of enterprises acquired. Hence, investment institutions, including Private Equity increasingly see the benefit of addressing sustainability and ESG in the context of their investments. The implementation of management processes, identifying both potential risks and business opportunities, criteria supports the selection of responsible investments as well as the value optimization of an acquired business or portfolio.

Environmental Social Governance (ESG) - Responsible Investment

Your needs

We are continuously approached by our clients, that see benefits of incorporating an ESG perspective into their business but do not have the respective in-house expertise. Typical questions which we have answered to our clients include:

- How do we implement our ESG policy effectively?
- What are the main financial advantages of implementing ESG management processes?
- How do we effectively identify and manage ESG risks and opportunities in our investments?
- How do we implement a reliable ESG reporting program?

Our services

Having a strong background in regulations, international guidance and industry best practices relating to ESG and sustainability performance, we have developed a particular expertise in:

- Due Diligence
- Management Consulting
 - Development of ESG management processes
 - ESG KPI Development
 - ESG Reporting
- Operational Consulting
- Compliance Assessments
- Supply Chain Assessments
